TECHNOLOGIES

Introduction

EROS is a E-commerce shopping platform currently available for the customers from Dubai . Designed for the future for digital and small screens. All the requirements and needy things in day to day life of peoples can easily they find in this site.

On a single search & a click anything can get on a single page, in a very quick manner. customers satisfaction is a first priority for us. & will always follow the words.

Type

- E-Commerce Website
- One Stop E-Commerce Portal

Problem Statement

Create a fast, scalable & real-time website for online shopping, where the requirements from day to day life can meet on single click.

Multi-dimensional services like booking & buying things from multiple resources.

Dealing with issues such as data capturing for multiple segments and various sources. Example - store multiple products with details of them from different companies

Solution

Use AWS- infrastructure and technology platforms to develop a sustainable online shopping system. Develop, deploy & integrate solutions from front-end and back-end to deliver a rich and intuitive user experience and offer a dynamic E-commerce shopping service for Eros.
